PC REPAIR TESTIMONIAL

Netproaz is awesome! My laptop was infected so badly, the entire screen was popups. I called them and my laptop was picked up three hours after my call and returned the following day. I picked the pc optimization and there is a report of the work on my desktop that covers everything and my antivirus programs that weren't working are all removed with new ones installed that are all set to run and scan so I have to do nothing! My laptop is so fast and internet pages just pop open. I was expecting to hear I needed to start over or something very bad but nothing, they just fixed it right away with no problems and gave me a student discount!

Thank you so much,

From: Michelle in Scottsdale, AZ.
